Rat & Mouse Bait

FASTDRAW™

- Contains high quality food-grade grains & oils and no wax for maximum attraction
- Breatable pouch allows smell to attract or “draw” rodents and encourage feeding
- Pouch can be securely fixed by nails, on wire between floor slats, in tough-to-access wall voids, or on rods in bait stations
- 10g bait pouch permits flexible, low-cost placement
- Maintains shape in extreme hot and cold environments
- Active Ingredient: Difethialone

BOOT HILL
KILLS RATS & MICE DEAD

**Best when used
March - August
Kill time: 4-6 days**

Boot Hill is a highly palatable, single-feed anticoagulant with a long history of proven efficacy. Its active ingredient, bromadiolone, was first introduced by LIPHATECH in the 1970s.

99050651	Boot Hill Mini-Block 10 lbs. - Bromadiolone	\$36.17	ups
99050652	Boot Hill Mini-Block 75 packs - Bromadiolone 1 pack = 1.5oz.	\$35.77	

HOMBRE™

**Best when used
September - February
Kill time: 4-6 days**

Each of the three Hombre formulations feature the industry's newest active ingredient: difethialone. It can be formulated at half the rate of other anticoagulants, making it the most palatable. Whichever baiting option you use, you're guaranteed quick control over tough rat and mice infestations.

Jan	Feb	Mar	Apr
May	June	July	Aug
Sept	Oct	Nov	Dec

Item No.	Description	Price	ups
99050653	Mini Blocks - 60 count - Difethialone	\$13.00	ups
99050654	Mini Blocks 10 lbs. - Difethialone	\$44.05	
99050655	Pellets Place Packs 100 - 9 oz.- Difethialone	\$35.95	

Gunslinger, LIPHATECH's newest rodenticide, is made with the active ingredient Bromethalin. Gunslinger is an effective addition to a rodent control baiting program. Since it has a different mode of action, it can be utilized in a program that otherwise utilizes anticoagulants. Plus, rodents stop feeding after eating a lethal dose, saving money and bait. More rats and mice can be controlled with less bait.

Item No.	Description	Price	ups
99050656	Blocks - 100 blocks - Bromethalin	\$49.96	ups
99050657	Pellet Packs - 75 pk - Bromethaline	\$41.76	

Use After Hombre. Before Fast Draw in January, Prior To The Next Year Rotation.

Use during cleanout when rodent food supplies are limited. Place baits in egg cartons. Stack & save unused bait for next cleanout period. Kill time: 12-24 Hours

Rat & Mouse Bait

The purpose of bait rotation is to eliminate the possibility of resistance to any active ingredients. By rotating between anticoagulant & Non-anticoagulant baits, a reliable, rodent-free environment can consistently be achieved.

Breaking Bait Rotation Will Break The Cycle of Resistance

Tomcat

Item No.	Description	Price

Item No.	Description	Price
99050098	Apple Flavor	\$25.98
99050099	Peanut Butter Flavor	\$24.95

Active ingredient: Diphacinone

Helpful Hints:

- Use 2-4 chunks per station.
- Pressure wash bait stations every six months to avoid residue build-up.
- Clean traps with a dry rage every 2-3 months depending on environment.
- Rodents will shy away from bait stations filled with debris.
- During wetter months, check for moldy baits. Replace if necessary.
- Large finishing nails work well for keeping internal bait chunks away from birds.
- Check monthly for external signs of rodent activity.

Interesting Facts:

- Rodents harbor mites, fleas and numerous harmful bacterial and viral agents.
- Mice can maneuver through a hole as small as 1/4 inch diameter.
- Norway rats average 100 pups per year, mice average 50 per year.
