# Chemical Delivery Made Easy

At Dilution Solutions, we are excited to offer products and accessories that are designed to enhance your chemical delivery systems. This catalogue includes Dosatron water-powered chemical injectors starting on page 2, along with installation options and accessories. You can check out Dosatron's Nutrient Delivery System (NDS) with its customizable capabilities, kits, and accessories beginning with page 13. Learn about the Etatron electric metering pumps and accessories starting on page 26 along with much more.

## We Are Here to Help

Call **1-800-451-6628** any time between 8:30 a.m. to 5:00 p.m. EST to speak directly with one of our knowledgeable customer service representatives.

## Come Visit Us in Florida

We offer training to become a "Certified Dosatron and/or Etatron Technician" at our service center in Clearwater, Florida. We also offer on-site training and workshops at your facility. To sign up, or to learn more about our training options, call **1-800-451-6628**.

## Need Maintenance? Send Us Your Injector or Pump

Dilution Solutions provides technical service and equipment maintenance at our repair center located in Clearwater, Florida. If your Dosatron or Etatron needs servicing, scan the QR code in the box to the right with your mobile device and complete the form, or call **1-800-451-6628** to receive a return authorization number and mailing instructions. We are always ready to help.

## User Friendly Website

Visit [www.dilutionsolutions.com](http://www.dilutionsolutions.com) to view all our products and accessories.

## REPAIR CENTER

Service and repairs are easy at Dilution Solutions. Just scan the QR code to request a return authorization number or call **1-800-451-6628**.

## Dosatron Water-Powered Chemical Injectors

**Dosatron non-electric technology has been trusted for more than 40 years!**

Dosatron chemical injectors are water-powered, so no electricity is necessary. They automatically compensate for flow and pressure changes providing consistent, repeatable results. Dosatrons are simple to use, easy to adjust and provide infinitely adjustable dosage rates. They are easy to maintain, saving you time and effort.

### How It Works

The Dosatron pulls up solution like a syringe, drawing in the concentrate with the plunger and displacing it into the body of the Dosatron, where it mixes with the incoming water. Then just the right amount of chemical is discharged into the water line.

## How to Choose the Right Dosatron for Your Application

Dosatron chemical injectors can be found in multiple industries, such as:

- Irrigation
- Animal Health
- Nutrient Delivery
- Vehicle Wash
- Drinking Water Treatment
- Food Safety & Sanitation
- Metal Processing
- Printing
- And many more!

To find the Dosatron injector that best fits your needs:

- First, name your industry and application \_\_\_\_\_
- Estimate your flow rate of water being treated in gallons per minute (GPM) or liters per minute (LPM) \_\_\_\_\_
- What dilution rate do you need in ratio, percentage or ounces per gallon? \_\_\_\_\_
- Which chemical are you injecting? \_\_\_\_\_
- Can you provide an SDS Sheet? \_\_\_\_\_

Once you have the information, give us a call at **1-800-451-6628**. Our trained customer service team members will help you choose the right Dosatron injector and answer any questions you might have. Or you may **CHAT** by going to **[www.dilutionsolutions.com](http://www.dilutionsolutions.com)**.

## Mobile Solutions

Proportional, on-demand dispensing for irrigation to sanitation and everything in between.

The carts are designed for maximum mobility and the Hook-Up Kit makes attaching your Dosatron injector a snap.

## Our Carts are Perfect for Mobile Foaming

### Sanitation

- Chemical application
- Foaming cleaners and disinfectants

### Irrigation and Hydroponics

- Mobile spot treatments in greenhouses
- Easy-to-maneuver in garden centers
- Portable fertilizing for gardens, vegetables, and trees
- Low-pressure spray applications
- Soil and root drenches

### Li'l Bud-D (5-gallon) Part #: HS15-5

The Li'l Bud-D cart is perfect for spot treatments and accommodates 11 and 14 GPM injectors. The cart features ergonomic design for extra maneuverability, no flat tires, and is constructed with high strength polypropylene. Dosatron injector and hook-up kit sold separately.

Cart Hook-Up Kit Part #: HSPK58LB.

### Li'l Bud-D (5-gallon)

The Li'l Bud-D cart is perfect for a wide variety of portable needs and accommodates the 11 and 14 GPM Dosatron injectors. Made of polyethylene and includes cart and 5-gallon bucket with lid.

The Li'l Bud-D Hook-Up Kit makes cart set-up easy and protects it from tipping over. It includes a filter, stainless steel clamps, 5/8" hose, and adapters.

Product	Description	Part #
Li'l Bud-D	5-gallon (includes Cart and 5-Gallon Bucket with Lid)	HS15-5
Li'l Bud-D Hook-Up Kit	11 and 14 GPM (Hook-Up Kit only)	HSPK58LB
PAA DosaCart Hook-Up Kit	11 and 14 GPM (Hook-Up Kit only)	HSPK58-PAA

Dosatron injector and Cart Hook-Up Kit are sold separately.

## DosaCart (15-gallon)

	<p>The 15-gallon DosaCart is the perfect, portable solution for garden centers and greenhouses. It has a translucent, polyethylene tank and accommodates the 11, 14, 20, and 40* GPM Dosatron injectors. Includes cart with clean-out valve, bracket, and crash bar.</p> <p>It's highly recommended to purchase a Hook-Up Kit for the 15-gallon DosaCart. The Hook-Up Kit makes cart setup easy and includes a filter, stainless steel clamps, 5/8" hose, and adapters.</p> <p>*Hook-Up Kit is not available for the 40 GPM.</p>		
	Product	Description	Part #
	DosaCart	15-gallon (Cart only).	HS15-16
	DosaCart Hook-Up Kit	11 and 14 GPM (Hook-Up Kit only).	HSPK58
	DosaCart Hook-Up Kit	20 GPM (Hook-Up Kit only).	HSPKD45

Dosatron Injector and Cart Hook-Up Kit are sold separately.

## Mobile Coolant Fill System (25-gallon)

	<p>The Mobile Coolant Fill System conveniently allows the user to add and adjust coolant concentrations as needed. Mixed coolant is dispensed directly into the machine sump, eliminating sloppy bucket filling, spills, the danger of slipping, and back injuries from lifting heavy pails. No more spilled coolant creating a slip hazard.</p>		
	Product	Description	Part #
	Mobile Coolant Fill System	25-gallon tank with 4 wheels for stability. No tilt ergonomic design and easy to maneuver. Stainless steel brackets. Integrated dosing pump. Easy to plumb Hook-Up Kit (see below).	HS25
	Mobile Coolant Fill System Plumbing Hook-Up Kit	The Mobile Coolant Fill System Plumbing Hook-Up Kit features elbows, unions, nipples, hose clamps, strap, 10' delivery hose and gasoline style gun.	HSPK25COOLKIT

## Eco-Cart - 11 GPM (5-gallon)

	This Eco-Cart is perfect for the home grower and garden center. It includes all you need to feed your flowers and plants. Designed with the 11 GPM-D25F1 (fixed 1:100), it includes cart, 5-gallon bucket with lid, D25F1 injector, and plumbing to connect the hose to inlet and outlet.		
	Product	Description	Part #
	Eco-Cart	5-gallon bucket with lid, D25F1 Injector, and plumbing.	HSECO-D25F1
	Eco-Cart without injector	Already have a Dosatron? No problem. Our Eco-Cart is available without the injector and includes cart, 5-gallon bucket with lid, and plumbing.	HSECO

## Eco-Cart - 14 GPM (5-gallon)

	This Eco-Cart is perfect for the home grower and garden center. It includes all you need to feed your flowers and plants. Designed with the 14 GPM-D14MZ2 includes cart, 5-gallon bucket with lid, D14MZ2 injector, and plumbing to connect the hose to inlet and outlet.		
	Product	Description	Part #
	Eco-Cart	5-gallon bucket with lid, D14MZ2 Injector, and plumbing.	HSECO-D14MZ2
	Eco-Cart without injector	Already have a Dosatron? No problem. Our Eco-Cart is available without the injector and includes cart, 5-gallon bucket with lid, and plumbing.	HSECO

## Proportioner

**Water-powered proportional, on-demand dispensing for irrigation to sanitation and everything in between.**

	Dosatron's self-cleaning polypropylene Venturi proportioner allows for flow rates up to 2 GPM at 58 psi in dosing mode and up to 13 GPM at 58 psi when in bypass/rinse mode. A simple one-quarter turn of the handle changes the function from dosing mode to bypass/rinse for simple operation. Turn the handle 180°F for back-flush mode, making cleaning and maintenance hassle-free. Perfect for washing and disinfection of hard surfaces and floors. A system, with 12 color-coded tips, is provided to allow for an injection range of 1:100 (1%) to 1:2.3 (43.6%).		
	Product	Description	Part #
	Dosatron Proportioner	This polypropylene proportioner features a back flush and rinse mode.	DSA-VENTURI

# Installation Ready Systems

## Standard 3/4" Single Panel Part #: PS6A130

- Ball valves
- Flow restrictor
- Pressure regulator
- Check valve
- Filter
- Sample port
- D14MZ2VFII
- Fittings
- Unions

## We offer Custom installation options for your convenience.

These pre-plumbed, secured systems are water-powered and include all the necessary accessories. Delivered installation-ready, they eliminate the need to put your chemical management system together piece-by-piece. Just take the system out of the box, install to your water line (no electricity needed), and you are ready to go!

### Panel Systems

Our panel systems are custom made, and factory tested prior to shipment. We offer two options: a black polyethylene panel or an aluminum diamond plate, your choice. If you don't see a panel that meets your specifications, give us a call at **1-800-451-6628** to discuss your specific installation needs.

### Standard 3/4" Single - Diamond Plate Panel

	Description	Part #
	<p>17" w x 24" h panel includes ball valves, flow restrictor, pressure regulator, check valve, filter, test port, Dosatron model D14MZ2VFII, and fittings.</p> <p>Other injectors are available in the same configuration mounted on the diamond plate panel.</p>	<p>PSD6A130</p>

### Failsafe Dual Panel - with Backup Dosatron

	Description	Part #
	<p>36" w x 24" h panel provides a backup Dosatron that is ready to go if needed. The panel includes an inbound t-filter, pressure regulator with gauge, ball valves, unions for quick disconnect to service units, one-way check valves, flow restrictors, and fittings.</p>	<p>Call <b>1-800-451-6628</b> for your specific part #.</p>

### Triple Unit Panel - Perfect for Triple Foam Applications

	Description	Part #
	<p>The 48" w x 24" h foam, car care panel is mounted on a diamond plate and is perfect for triple foam or three independent chemicals. Ideal for new installations or retrofits.</p>	<p>Call <b>1-800-451-6628</b> for your specific part #.</p>

## Self Service Panel - Used in Car Wash for Presoaks and More

	Description	Part #
	The 17" w x 24" h panel for car care is mounted on a diamond plate and is perfect for presoaks, detergents/soaps, drying agents, bug remover, and waxes.	Call <b>1-800-451-6628</b> for your specific part #.

## Coolant Mixing Panel - Control Your Coolant Management

	Description	Part #
	The 24" w x 36" h panel needs no external power. It can increase tool life, reduce reject rates, control bacterial growth, reduce skin/respiratory issues, reduce foaming to maximize tramp oil filter efficiency and chip collection. It includes a D14MZ10VVF, t-filter, ball valves, flow restrictor, pressure regulator with gauge, fittings, 10' injection hose, and water hammer arrestor. The Fill Accessory Kit sold separately (see below).	PS4A150

## Coolant Mixing Panel - Fill Accessory Kit

	Description	Part #
	All you need for a quick installation is the Coolant Mixing System Fill Accessory Kit. The Kit includes polypropylene gas nozzle, 15' mixed coolant discharge hose, 2 barbs, and 2 hose clamps.	HOSEKITGUN34

## Vibratory Panel - The Solution for Vibratory Finishing

	Description	Part #
	The 17" w x 24" h panel is the perfect solution for vibratory finishing. It includes the Dosatron D07RE5, adjustable flow meter, 200 mesh filter, ball valve, check valve, and rigid polypropylene panel.	PS6VIB126

## Beer Line Cleaning Sanitation Panel

	Description	Part #
	This 17" w x 8" h panel provides you optimum cleaning of your beer lines. It includes mini panel, D25RE2VFBPII, filter, and check valve. Other models are available. For more information call <b>1-800-451-6628</b> .	PS8A136BLC

## Nutrient Delivery System Panel (NDS) - for more information see page 13

	Description	Part #
	The NDS is made up of 4 main panel sections which can be arranged to accommodate a wide variety of fertigation programs. It thrives anywhere, from greenhouse environments to outdoors, allowing installation in any application.	Call <b>1-800-451-6628</b> for your specific part #.

## Floor Scrubbing Fill Station Panel

	Description	Part #
	24" w x 17" h panel with Dosatron D14MZ2VFII (14 GPM).	PS6A130FS
	24" w x 17" h panel with Dosatron D45RE15VFII (20 GPM).	PS4A081FS
	24" w x 17" h panel with Dosatron D8RE2VFII (40 GPM).	PS4A190FS
	The 24" w x 17" h panel will perfectly mix your chemicals without waste. It's easy to adjust by setting the desired dilution rate and easy to use, just grab the gas nozzle and fill.	

# Cabinet Systems

## Dosatron Cabinet Systems Are Custom Built For You!

Keep unauthorized personnel from disturbing your chemical management system along with physically protecting your injector. These attractive, locking, stainless steel cabinets can be plumbed to your exact specifications and be ready for installation. If you don't see the cabinet that meets your specifications, give us a call at **1-800-451-6628**.

### Standard 3/4" Single Stainless Steel Locking Cabinet

	Description	Part #
	The 17" w x 24" h x 7 1/2" d, locking cabinet includes ball valves, flow restrictor, pressure regulator, check valve, filter, test port, D14MZ10VFII, and fittings.	SC1A151

### Failsafe Dual Stainless Steel Locking Cabinet - With Backup Dosatron

	Description	Part #
	The 24" w x 31" h x 7 1/2" d cabinet provides a backup Dosatron that is ready to go if needed. Fitted with ball valves, pressure regulator with gauge, fittings, one-way check valve, inbound filter kit, and outlet connector with a ball valve.	Call <b>1-800-451-6628</b> for your specific part #.

### Dual Cabinet in Series

	Description	Part #
	The 24" w x 31" h x 7 1/2" d cabinet is fitted with a pressure regulator, ball valve, unions for quick disconnect to service units, one-way check valve, inbound filter kit, and outlet connector with ball valve.	Call <b>1-800-451-6628</b> for your specific part #.

## Coolant Mixing Cabinet - Control Your Coolant Management

	Description	Part #
	<p>24" w x 31" h x 7 1/2" d, Dosatron's proportional coolant mixing cabinet is easily installed and requires no external power source. The Coolant Mixing Cabinet can increase tool life, reduce reject rates, control bacterial growth, reduce skin and respiratory issues, and reduces foaming to maximize tramp oil filter efficiency and chip collection. It includes the D14MZ10VVF, t-filter, ball valves, flow restrictor, pressure regulator with gauge, fittings, 10' suction hose, and water hammer arrestor. Accessory kit available, see below.</p>	<p>SC2A150</p>

## Coolant Mixing System - Fill Accessory Kit

	Description	Part #
	<p>All you need for a quick installation is included in the Coolant Mixing System Fill Accessory Kit. It includes polypropylene gas nozzle, 15' mixed coolant discharge hose, barbs, and hose clamps.</p>	<p>HOSEKITGUN34</p>

## Mounting Bracket

### 3-Sided, Space Saver Mounting Bracket - For Those Tight Areas

	Description	Part #
	<p>The Mounting Bracket is 12" w x 12" h x 12" d with 2" flanges and is the perfect fit for those tight areas. It uses less than 35% wall space versus a standard triple foam panel. The 3-sided bracket is made of rugged diamond plate. The finished size, with units attached, is 23" w x 24" h x 17" d. For a custom pre-plumbed system, call <b>1-800-451-6628</b>. Dosatrons and hardware sold separately.</p>	<p>PANEL3</p>

**All our panels and cabinet systems are factory tested prior to shipment!**

# Service and Maintenance

## Rebuild Kits

Extend the life of your water-powered Dosatron with our Rebuild Kits. Each kit includes two parts. Part one includes the piston contents, and part two includes items to replace three seals and the check valve assembly. To order, find your specific Dosatron 14 GPM model part number. If you need help, give us a call at **1-800-451-6628** or **CHAT at [www.dilutionsolutions.com](http://www.dilutionsolutions.com)**.

# Nutrient Delivery System (NDS)

The NDS is a simple system made up of four main panel sections. You can arrange to accommodate a wide variety of fertigation programs. With total control in mind, customizing the entire panel is easy, based on your personal nutrient program!

The Nutrient Delivery System allows for the use of up to 8 different nutrients, additives, or supplements along with a pH adjuster — all in one well-blended solution. It thrives anywhere, from greenhouse environments to outdoors, allowing installation in any application. And, by automating the nutrient delivery process, it accurately dispenses the desired solution, making the time draining practice of “measure and pour” a thing of the past, saving you time and money!

NOTE: Installation illustrations are to be used as a reference guide only.

## DIY Nutrient Delivery Kits

### Nutrient Delivery Systems Are Customized With The Number Of Dosers Needed.

Creating the right nutrient mix for your hydroponic growing operations is a delicate science. With Dosatron's full line of dosers, you can automate your process to create fine-tuned, multi-chemical mixes with repeatable results, every time!

They are water-powered so no electricity is needed and compared to other dosing products on the market, they are easy to maintain and keep in service — saving you time and money.

#### Kits available:

- Lo-Flo Series (11/14 GPM - 3/4" NPT)
- Hi-Flo Series (40 GPM - 1 1/2" NPT)

If you are hands-on and like to create your setup, these Kits are for you. Choose the Kits and Dosers to fit your specific requirements, then assemble. Questions? Call **1-800-451-6628**.

### Applications

- Aquaponics
- Vertical Farming
- Drip Irrigation
- Ebb and Flow

### Benefits of the Dosatron System

- Used to accurately fill reservoirs or in a drain to waste system — eliminating the need to measure and pour
- Easy to adjust the amount of nutrient dispensed — just turn the dial to set the necessary dosage rate
- Designed to perform in both indoor and outdoor environments
- Precise nutrient management, eliminating waste, increasing yields
- Simple and inexpensive to maintain — easy to use

NOTE: Installation illustrations are to be used as a reference guide only.

## Lo-Flo Series (11 and 14 GPM - 3/4")

### Starter Kit

	Description	Part #
	It includes all the parts you need to get started, from ball valves to Teflon® tape. Dosatron dosers sold separately.	HYKSTART

### Mixing Chamber Kit

	Description	Part #
	Enhances blending as the solution passes through the Mixing Chamber.	HYKMC34

### Monitor Kit

	Description	Part #
	Includes a unique in-line nutrient monitor that measures and displays your well-blended outgoing solution. No more guess work involved in feeding your plants!	HYKMON

### End Kit

	Description	Part #
	An alternative to the Monitor Kit, the End Kit includes all the necessary plumbing parts to complete your NDS setup.	HYKEND

NOTE: Installation illustrations are to be used as a reference guide only.

## Hi-Flo Series (40 GPM - 1 1/2")

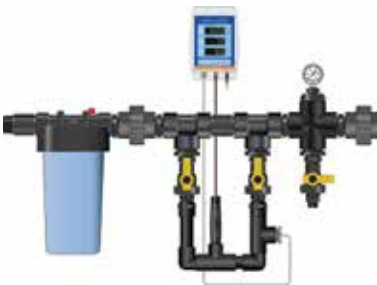

### Starter Kit

	Description	Part #
	<p>It includes all the parts you need to get started, from ball valves to Teflon® tape. Dosatron dosers sold separately.</p>	<p>HYKSTART150</p>

### Mixing Chamber Kit

	Description	Part #
	<p>Enhances blending as the solution passes through the Mixing Chamber.</p>	<p>HYKMC150</p>

### Monitor Kit

	Description	Part #

## NDS Micro Doser Panels

### Ultimate Delivery with the Etatron eOne Micro-Doser System

The Etatron eOne Micro-Doser, combined with the Dosatron Lo- and Hi-Flo Dosers, make the perfect combination to customize a delivery system for your specific applications. The blending of these dosers brings the ultimate in reliability and functionality, in one system — The Nutrient Delivery System!

The Etatron eOne accurately doses super-concentrated products into an existing fertigation system. It hits the targets that many of the high-value products, on the market, demand.

- You can adjust the amount dispensed with every stroke
- Dial into micro-dose, down to 0.25 mL per gallon
- Allow for the ultimate in reliability and functionality in one system
- Designed to be in unison with the NDS

### NDS Micro Doser Panel - Lo-Flo (3/4" NPT)

#### Description

The NDS Lo-Flo Etatron eOne MF Micro-Doser includes:

- eOne MF 0110 pump
- Polyethylene panel
- PVC suction tube
- Water meter
- Check valve
- Injection valve
- PVC bleed-off tube
- Polyethylene discharge tube
- Pressure relief valve
- Unions
- Foot filter
- Mixing chamber

**NOTE:** Installation illustrations are to be used as a reference guide only. Bucket not included.

#### Part #

Lo-Flo:  
PE0110MF.75INX1PR

### NDS Micro Doser Panel - Hi-Flo (1 1/2" NPT)

#### Description

The NDS Hi-Flo Etatron eOne MF Micro-Doser includes:

- eOne MF 0110 pump
- Polyethylene panel
- PVC suction tube
- Water meter
- Check valve
- Injection valve
- PVC bleed-off tube
- Polyethylene discharge tube
- Pressure relief valve
- Unions
- Foot filter
- Mixing chamber

**NOTE:** Installation illustrations are to be used as a reference guide only. Bucket not included.

#### Part #

Hi-Flo:  
PE0110MF1.5INX1PR

## Installation Accessories

The accessories were specifically chosen to enhance your Dosatron set-up. If you have any questions, or can't find what you are looking for, give our customer service team a call at **1-800-451-6628**.

### Water Hammer Arrestor Kits

Water hammer is a pressure surge, or wave caused when a fluid in motion is forced to stop or change directions suddenly. An example is if the flow control valve (on/off) is positioned downstream from the Dosatron. For this type of installation and others with strong water hammer potential, we recommend using a water hammer arrestor kit for easy and optimum installation.

**Remember, arrestors should always be installed so the shock dead-ends into the arrestor.** Arrestors should be placed as near to the source of shock as possible. The illustration shows proper positioning where the shock would be most effective.

	Description	Part #
	<b>Kit for 3/4" line:</b> 3/4" MPT x 6 1/2" tall, stainless steel water hammer arrestor, nipple, tee, elbows, Teflon® tape, and union. Normal operating pressure 35 to 500 psi. Spike pressure not to exceed 2,000 psi.	WHA34-SS-KIT
	<b>Kit for 1" line:</b> 1" MPT x 6 1/2" tall, stainless steel water hammer arrestor, nipple, tee, elbows, Teflon® tape, and union. Normal operating pressure 35 to 500 psi. Spike pressure not to exceed 2,000 psi.	WHA100-SS-KIT
	<b>Kit for 1 1/2" line:</b> 3/4" MPT x 11 3/16" tall, stainless steel water hammer arrestor, nipple, tee, elbows, Teflon® tape, and union. Normal operating pressure 35 to 500 psi. Spike pressure not to exceed 2,000 psi.	WHA150-SS-KIT
	<b>Kit for 2" line:</b> 1" MPT x 11 3/16" tall, stainless steel water hammer arrestor, nipple, tee, elbows, Teflon® tape, and union. Normal operating pressure 35 to 500 psi. Spike pressure not to exceed 2,000 psi.	WHA200-SS-KIT

## Industrial Plumbing Kit (IPK)

Dosatron's IPKs are an all-in-one installation kit that includes what you need to install and protect your Dosatron chemical injector. They include:

- Ball valves - opens and closes the line
- 200 mesh filter - stops large particles from entering the Dosatron
- Pressure regulator with gauge - regulates incoming pressure
- Flow restrictor prevents excessive flow
- Check valve
- Unions - for easy injector removal
- Roll of Teflon® tape
- Instruction card
- Fittings

## Industrial Plumbing Kits

	Description	Part #
	3 GPM Industrial Plumbing Kit, 3/4" connection.	IPK34-3GPM
	3 GPM Industrial Plumbing Kit with mixing chamber, 3/4" connection.	IPK34MC-3GPM
	7 GPM Industrial Plumbing Kit, 3/4" connection.	IPK34-7GPM
	9 GPM Industrial Plumbing Kit, 3/4" connection.	IPK34-9GPM
	10 GPM Industrial Plumbing Kit, 3/4" connection.	IPK34-10GPM
	10 GPM Industrial Plumbing Kit with mixing chamber, 3/4" connection.	IPK34MC-10GPM
	14 GPM Industrial Plumbing Kit, 3/4" connection.	IPK34-14GPM
	14 GPM Industrial Plumbing Kit with mixing chamber, 3/4" connection.	IPK34MC-14GPM
	20 GPM Industrial Plumbing Kit, 1" connection.	IPK100-20GPM

Kits may vary depending on IPK ordered.

## Quick Priming and Sample Collection Instructions

Follow the easy step-by-step instructions below.

### Quick Priming

- Shut off outlet ball valve
- Insert injection hose into the chemical container
- Turn on the discharge valve (collect discharged solution or send it to drain)
- Observe the injection hose and when full, count 10 clicks
- Shut off discharge valve
- Turn outlet ball valve on

### Sample Collection

- Prime the unit
- Shut off outlet ball valve
- Turn on the discharge valve
- In a clean container, collect 2.5 gallons of diluted solution
- Turn off discharge valve
- Collect sample out of the 2.5 gallons and check concentration
- Turn on the outlet valve

**NOTE:** Make sure to use personal protective equipment (PPE) when disassembling injector or handling chemicals.

## Dosa Lock

	Description	Part #
	Dosa Lock is an easy-to-install lockout device that protects unauthorized access to your injector and fits most Dosatron units. It is tamper resistant, controls chemical costs, fits injectors ranging from 11 GPM up to 40 GPM, made of high impact strength polypropylene, secures your settings, and is resistant to most chemicals. Dosa Lock comes with lock and key. Dosatron injector sold separately.	DOSA-LOCK
	Replacement Lock and Key set (keyed alike).	DOSA-PL
	Replacement Key only.	DOSA-PLKEY

## Mixing Chamber

Enhance your chemical blending by using a mixing chamber.

	Description	Part #
	3/4" Mixing Chamber provides enhanced chemical blending, is excellent for extremely low flow applications, and low volume requirements (bottle fill), along with minute injection rates. Made of polycarbonate and polypropylene.	MC34
	Mixing chamber bracket for 3/4" clear mixing chamber.	MC34-BRACKET
	3/4" Mixing Chamber, is excellent in low flow applications. Made of polypropylene.	MC34-PP
	1" Mixing Chamber is excellent in low flow applications. Made of polypropylene.	MC100
	1 1/2" Mixing Chamber is excellent in low flow applications. Made of polypropylene.	MC150

## Mixing Chamber Sunshade

	Description	Part #
	Light blocking mixing chamber sunshade for 3/4" mixing chamber. Prevents the light from impacting nutrient rich water, eliminating the potential for biofilm and algae growth in the chamber. Removable cover for the clear bowl portion of the mixing chamber.	MC34-SHADE
	Features: <ul style="list-style-type: none"> <li>• Neoprene custom size cover</li> <li>• Black base and trim</li> <li>• Easily slips on and off for viewing</li> </ul>	

## DAB Mini Booster Pump 2 HP

	Description	Part #
	Integrated, electronic water booster system for domestic and residential use that provides the comfort of constant water pressure, while saving energy.	X500-109-DAB2HP
	Features: <ul style="list-style-type: none"> <li>• Capacity up to 32 GPM, head up to 210'</li> <li>• Maximum pressure 115 psi</li> <li>• Self-priming double impeller pump</li> <li>• Water cooled motor</li> <li>• Dry run and antifreeze protections</li> </ul>	

## Check Valve

Putting a Check Valve before the injection pump allows a one-way flow towards the unit. It can help prevent back flow if the fluid in the line reverses direction.

	Description	Part #
	3/4", 11 GPM Check Valve rated up to 200 psi. It includes extra 3/4" MPTX x 3/4" MGHT and is made of Schedule 40 PVC.	CV34-11GPM
	3/4" Check Valve rated up to 200 psi. Made of polypropylene and Hastelloy.	CV34-PH
	1", 20 GPM Check Valve rated up to 200 psi. Made of Schedule 40 PVC.	CV100
	1 1/2", 40 GPM Check Valve rated up to 200 psi. Made of Schedule 40 PVC.	CV112
	2", 100 GPM Check Valve rated up to 200 psi. Made of Schedule 40 PVC.	CV200

## Water Meter

A Water Meter measures the flow through a specific portion of a system.

	Description	Part #
	3/4" Totalizer Water Meter with a pulse valve of 1/10 gallon (1 pulse per 10 gallons), lightweight analog reads gallons. Made of polypropylene.	WM34-1PP10G
	3/4" Totalizer Water Meter with a pulse valve of 1/1 gallon (1 pulse per 1 gallon), lightweight analog that reads gallons. Made of polypropylene.	WM34-1PPG

## Flow Restrictor

	Description	Part #
	3/4" Flow Restrictor, 3 GPM maximum and made of nickel plated brass.	FR34-3GPM
	3/4" Flow Restrictor, 7 GPM maximum and made of nickel plated brass.	FR34-7GPM
	3/4" Flow Restrictor, 9 GPM maximum and made of nickel plated brass.	FR34-9GPM
	3/4" Flow Restrictor, 10 GPM maximum and made of nickel plated brass.	FR34-10GPM
	3/4" Flow Restrictor, 20 GPM maximum and made of nickel plated brass.	FR34-20GPM
	3/4" Flow Restrictor, 14 GPM maximum and made of PVC.	FRI-14GPM
	1 1/2" NPT Flow Restrictor assembly, 40 GPM maximum and made of Schedule 80 PVC.	FR200-40GPM

## Vacuum Breaker Valve

This Valve will prevent the siphoning of chemicals when the unit is turned off. Siphoning will lead to a higher concentration of chemicals in the line and inaccurate readings when the unit is initialized.

	Description	Part #
	3/4" NPT connection.	VBV34
	1" NPT connection.	VBV100

## Filters

All our filters include a cleanable, permanent, stainless steel filter. No replacement cartridges are necessary.

	<b>Description</b> 3/4" Spin-Down Filter Kit with 200 mesh/80 micron and quick, clean-out valve. Made of polypropylene and includes Schedule 80 unions.	<b>Part #</b> AKF5AP11KIT-A
	1" Spin-Down Filter Kit with 200 mesh/80 micron and quick, clean-out valve. Made of polypropylene and includes Schedule 80 unions.	AKF5AP20KIT-A
	1 1/2" Spin-Down Filter with 200 mesh/80 micron and quick, clean-out valve. Made of polypropylene.	AKF5AP40-A
	3/4" FNPT T-shaped, space saving Filter with 200 mesh/80 microns. Made of fiber charged polypropylene. The flush port is adaptable for clean-out of the 3/4" FPT ball valve.	AKF5AP11T
	3/4" T-shaped, space saving Filter with 200 mesh/80 microns. Made of industrial grade polypropylene. It is small and compact, perfect for tight installations.	AKF5AP11T-S
	1" T-shaped, space saving Filter with 200 mesh/80 microns. Made of fiber charged industrial polypropylene.	AKF5AP20T
	2" Filter with 200 mesh/80 microns. Made of polypropylene with spin down, quick clean-out valve.	AKF5AP100-A

## Certified NSF Filters

These filters are NSF Certified, 42 Housing. Replaceable FDA approved, CFR Title 21 String Cartridge, NSF 42/61.

	<b>Description</b> 3/4" NPT Filter. Head made out of polypropylene with SAN (Styrene-acrylonitrileplastic) bowl (clear).	<b>Part #</b> AKF5AP11NSF
	1" NPT Filter. Made out of polypropylene (blue bowl).	AKF5AP20NSF
	1 1/2" NPT Filter. Made out of polypropylene (blue bowl).	AKF5AP40NSF

**NOTE:** Always follow the rules and regulations in your area in regards to water source protection. A different piece of equipment may be adapted to your specific situation.

## Pressure Regulator

Pressure reducing valves are devices which, when installed on water systems, decrease the pressure from the incoming water line.

	Description	Part #
	3/4" NPT Pressure Regulator with female inlet and outlet. Working pressure is 15-87 psi, has a maximum incoming pressure of 230 psi, maximum temperature of 140°F, and is preset at 43.5 psi. It is a chrome plated, brass body with 2" face.	PR34
	1 1/2" MPT and/or 1" FPT Pressure Regulator comes with one 1" FPT union adapter for easy installation and maintenance. Set pressure is 50 psi, it is adjustable from 25 to 75 psi and designed to reduce pressures up to 400 psi. Made of brass.	PR100
	2" MPT or 1 1/2" FPT Pressure Regulator comes with one 1 1/2" FPT union adapter for easy installation and maintenance. Set pressure is 50 psi, it is adjustable from 25 to 75 psi and designed to reduce pressures up to 400 psi. Made of brass.	PR112

## Pressure Gauge

	Description	Part #
	3/4" Pressure Gauge with 2" face. It has a bottom mount only with 1/4" MPT, 1 - 100 psi, and made of brass.	PG100
	This Pressure Gauge has an extra needle that remains at the maximum pressure reached. It has a 2 1/2" face with 160 psi and maximum pointer. Made of stainless steel.	PG160-MP-T

## Pressure Gauge Kit

Kit includes a T-fitting and a reducer fitting for easy in-line installation. Has a 2" face and made of polypropylene.

	Description	Part #
	3/4" FPT with 0 - 100 psi.	PG100-34KIT
	1" FPT with 0 - 100 psi.	PG100-100KIT
	1 1/2" FPT with 0 - 100 psi.	PG100-150KIT

## Foam Up Series

### Airless Foam Wand

Our Foam Up Series creates foam without the need for compressed air! Use downstream from your Dosatron to create a wet or clinging foam that increases chemical contact time and effectiveness.

	Description	Part #
	The polypropylene Airless Foam Wand has a stainless steel ball valve, is pump fed with a 20' throw at 60 psi and a solution flow rate of 6.3 GPM at 40 psi.	X400-113

## ChemStick Pick-Up Assembly

The ChemStick was designed to be used with either a barrel or tote and easily connects to existing pick-up tubes.

Features include:

- Chemical and acid resistant polypropylene construction
- Viton® seals
- Adjustable stopper for setting depth
- Rigid pipe
- Vented, so it doesn't allow debris in the container

Includes:

- 4 polypropylene hose barbs: 1/4", 3/8", 1/2", and 3/4"
- Foot spacer (1/2")
- Chemical check valve to prevent backflow
- Hastelloy strainer that is easy to clean

	Description	Part #
	33" long with <b>bung adapter</b> for a barrel.	CS33
	48" long with <b>bung adapter</b> for a barrel.	CS48
	54" long with <b>bung adapter</b> for a barrel.	CS54
	48" long with a <b>tote plate</b> cover.	CSP48
	54" long with a <b>tote plate</b> cover.	CSP54
	The ChemStick for 5-gallon bucket is easy-to-set-up and vented. 1/4" (6mm) in size with a universal fitting that can be used with any 5-gallon bucket with a spout. 5-gallon bucket not included.	CS12-6
	ChemStick for 5-gallon bucket. 5/16" (8 mm) in size.	CS12-8

## Miscellaneous Accessories

	Product	Description	Part #
	Injector Tote Stand	Place the Injector Tote Stand on top of your barrel, drum, tote, or mini-bulk tank and thread a garden hose into either side for a quick and easy installation.	X500-103
	Bucket Stacker	Stacks two 5-gallon buckets in the footprint of one! Made of white PVC coated steel and built for stability. The lid holds up to a 3/4" suction hose, and it can hold up to 70 pounds of liquid. Tubing and buckets not included.	BS5
	5-Gallon Bucket	Translucent bucket has an expandable spout lid and graduated measurement sticker. Made of polypropylene.	PB5GAL

## Tools and Supplies

### Perfect for Maintenance

#### Dosa-Lube

Dosa-Lube is perfect for conditioning static seals and o-rings. It comes in a conveniently sized packet of 2.5-grams.

	Description	Part #
	Dosa-Lube comes in a 2.5-gram packet. It includes silicone.	DOSA-LUBE

### Repair Supplies

	Product	Description	Part #
	Universal Strap Wrench	Ideal for use on 7 - 40 GPM Dosatron bell housings. Can also be used to remove the sleeve on the Dosatron 100 GPM injector.	TOOL01
	Seal Remover Pick	Safely and quickly remove seals from their seat without damaging surrounding areas.	TOOL02
	Pressure Tester	2 1/2" face, 160 psi, brass Pressure Tester with maximum pointer. Helps to identify pressure spikes and pressure related issues.	PG160-MP
	Testing Station	Repair and testing station panel for 3/4" Dosatron injectors. It allows for quick and easy hook-up. Dosatron injector not included.	TBLD34

## HM Meters/Testers

### Tools to Determine Specific Measurements

#### Pro HM Digital EC Meter

	Description	Part #
	<p>Testing and monitor digital meters for receiving the desired results, they quickly measure conductivity, TDS, and temperature of water.</p> <p>Features:</p> <ul style="list-style-type: none"> <li>• Low battery warning</li> <li>• Professional model</li> <li>• Waterproof body. It floats too!</li> <li>• Pinpoint accuracy, highly versatile - 0.5 and 0.7 scale!</li> <li>• Easy digital calibration</li> <li>• Replaceable probe</li> <li>• Comes with lanyard</li> <li>• 1-year warranty</li> <li>• Measures EC/PPM/TEMP</li> </ul>	COM-100

#### Pro HM Digital pH Meter

	Description	Part #
	<p>Testing and monitor digital meters for receiving the desired results, they easily measure pH and temperature of water.</p> <p>Features:</p> <ul style="list-style-type: none"> <li>• Low battery warning</li> <li>• Professional model</li> <li>• Waterproof body. It floats too!</li> <li>• Easy, automatic digital calibration</li> <li>• Replaceable probe</li> <li>• Lanyard included</li> <li>• Rewettable tips</li> <li>• 1-year warranty</li> <li>• Measures 0.00 - 14.00 pH</li> </ul>	PH-200

### Calibration Solutions

	Product	Description	Part #
	pH Storage Solution	Keeps probe balanced. Contains fungicide and helps probe last longer.	PH-STOR
	EC Ready-to-use Liquid Calibration Packets	20 pack, TDS/EC solution. 20 mL packets of 1000 ppm/2 mS solution.	CP-1000
	pH Ready-to-use Liquid Calibration Packets	20 pack, pH-7 buffer solution, 20 mL packets of pH-7 solution.	PH-P7

### Meter Protective Cases

	Description	Part #
	Hard-sided, Plastic Protective Case for your pH Digital Meter. The case includes a PH-200 Meter, 2-pH buffer solutions, storage solution, and a lanyard.	X600-102-PH
	Hard-sided, Plastic Protective Case for your EC Digital Meter. The case includes a COM-100 Meter and a lanyard.	X600-102-EC
	Hard-sided, Polypropylene Protective Case for your EC or pH Digital Meter. The interior has a triple layer of pick and pluck foam for added protection. There are integrated, metal core rear hinges with snap locking front clasps. Case only, meters and solutions sold separately.	X600-102

# Etatron Electric Metering Pumps

## The perfect answer for your water treatment plan.

Etatron is a leader in electric chemical metering pumps, providing electrical solenoid, peristaltic, and motor pumps along with controllers, for over 35 years.

Built with a broad range of chemical resistant materials and features:

- One-Piece Teflon® Diaphragm
- Manually Controlled
- Operated with a Water Meter or Flow Meter
- Control 4 - 20 mA
- pH, EC, and ORP Probes
- 2-Year Warranty

Etatron metering pumps are simple to use, highly reliable and are compact in size. They are available in:

- 12V
- 24V
- 115V
- 230V
- 50/60 Hertz

## Etatron Pumps Include:

- eOne Series
- PKX Series
- DLX/DLXB Series
- Motor Pump Series
- ePool Series
- F/B Series

NOTE: Installation illustrations are to be used as a reference guide only.

## How to Choose the Right Etatron Pump for Your Application

Etatron electric metering pumps can be found in multiple industries, such as:

- Irrigation
- Animal Health
- Nutrient Delivery
- Vehicle Wash
- Drinking Water Treatment
- Food Safety & Sanitation
- Metal Processing
- Printing
- and many more!

To find the Etatron pump that best fits your needs:

- How much chemical do you need to inject in an hour (liters or gallons)? \_\_\_\_\_
- What is the maximum pressure in the water line? \_\_\_\_\_
- What chemical are you injecting? \_\_\_\_\_
- How do you want to operate the pump for the best chemical delivery? \_\_\_\_\_

Once you have the information, give us a call at **1-800-451-6628**. Our trained customer service team members will help you choose the right Etatron pump and answer any questions you might have. Or you may **CHAT** by going to **www.dilutionsolutions.com**.

## eOne Series

eOne's technical characteristics deliver a reliable and effective solution.

- High stroke rate up to 300 impulses/minute
- Flow rate variation control in relation to pressure changes
- Energy efficient using absorbed power control in comparison to the real dosing conditions.  
Advantages: constant dosing, energy saving, low operating temperatures
- eOne Metering pumps power supply range of 100 to 250VAC (50-60 Hz) voltage
- Proportional function, 1 to 1 on all manual pumps
- UNDERLOAD – Suction alarm in the event of low chemical level, blocked suction valve or damaged suction line
- OVERLOAD – Discharge alarm in the event of over pressure in pump head caused by an obstruction or increased operating system pressure beyond the pump specification
- Level control

Characteristics include: Maximum injection frequency equal to 300 impulses/minute, Power voltage supply range 100 - 250VAC (50/60 Hz), Maximum absorbed power 32 W to 4. Proportional function 1 to 1.

eOne Wetted Parts	
Pump Head	PVDF
Diaphragm	PTFE (Teflon®)
Seals	TFE/P (Aflas®)

3005	7.92 GPH	30 LPH	72 PSI	5 BAR	300

### e128 Livestock Medicator - a True 11 GPM Electric Medicator

#### Description

The e128 Medicator is the perfect pump for both your medicating and water treatment needs. Etatron's operation is NOT affected by water quality and is simple to use, highly reliable, and compact. Features include:

- Fixed at 1:128
- Pump capacity is equivalent to an 11 GPM water-powered medicator
- Pump automatically compensates injections for variations in flow
- 120V, 60 Hz
- IP65 acid resistance housing
- Self-priming pump head with manual air bleed for fast self-priming
- Suction alarm to detect when bucket is empty
- PVDF solenoid head for enhanced chemical resistance
- Long lasting unique one-piece Teflon® PTFE diaphragm design
- Connects to 1 pulse per gallon (1PPG) or 1 pulse per 10-gallons (1PP10G) water meter
- 2-year warranty

## eMP

### Description

The eMP Livestock Water Treatment metering pump is the perfect answer for your water treatment. It is simple to use, highly reliable, and compact in size. Features include:

- Flow — 0.26 GPH (1 LPH)
- Max pressure — 145 PSI (10 BAR)
- Weight — 6.7 lbs.
- Stroke output (mL) — 0.09 at 145 PSI (10 BAR)
- Max pulses per minute — 180
- Mount type — wall mount
- Voltage — 120V

## eOne Basic

### Description

The eOne Basic is an analog metering pump. It has manual flow control with dual scale adjustment from 0 to 100% or 1 to 20%. Other features include a volumetric proportional mode (1:1) via input from a reed switch water meter and a level alarm.

- Flow rate regulation, 0 to 100% and 0 to 20%
- Proportional mode 1 to 1 with water meter input
- Level control setting (supplied without probe)

## eOne MA

### Description

The eOne MA is an analog metering pump. It has manual flow control with dual scale adjustment from 0 to 100% of 0 to 20%. There is also a volumetric proportional mode (1:1) via input from a reed switch water meter. Features include:

- Underload suction alarm
- Overload discharge alarm
- Level alarm

NOTE: Installation illustrations are to be used as a reference guide only.

## eOne MF

### Description

The eOne MF is a multifunction microprocessor metering pump, suitable for applications which require proportional dosing. The pump operates at a high dosing frequency (up to 300 impulses/minute) and is equipped with backlit graphic display for correct setting of the various programming parameters.

The eOne MF features are:

- Proportional dosing modes (1 x n; 1 : n; 1 x n M; ml x l; L x l; ml x m3; PPM)
- Digital manual control
- Level control
- Flow rates calibration
- Flow sensor input
- 4-20 mA control
- Pump output display
- Relay output
- Underload suction alarm
- Overload discharge alarm

## eOne Plus

### Description

The eOne Plus microprocessor controlled metering pump is suitable for proportional applications with built-in controller for pH, Redox, and Chlorine regulation. pH measuring range is 0 to 14 pH; Redox measuring range is -1000 to +1400 mV; and Chlorine measuring range is 0 to 2, 0 to 20, and 0 to 200 ppm.

The pump operates at high dosing frequency (up to 300 impulses/minute) and is equipped with backlit graphic display for correct setting of various programming parameters.

The eOne Plus features are:

- Proportional dosing modes (1 x n; 1 : n; 1 x n M; ml x l; L x l; ml x m3, PPM)
- Relay output
- Underload/overload alarms
- 4-20 mA output
- Proximity switch
- Integral pH, Rx, or chlorine control
- PT100 temperature input
- Digital manual control
- Level control
- Flow rate calibration
- Flow sensor input
- Pump output display

## PKX Series

The PKX metering pump is compact and can be wall-mounted or foot-mounted.

PKX Wetted Parts	
Pump Head	PP (Polypropylene)
Diaphragm	PTFE (Teflon®)
Seals	FPM (Viton®) or EPDM (Dutral®)
Valves	Duck Bill FPM (Viton®) or EPDM (Dutral®)
Discharge Tubing	PE (Polyethylene)
Suction Tubing	PVC

Version	Flow Rate		Pressure		Strokes Per Minute
0105	0.26 GPH	1 LPH	72 PSI	5 BAR	120
0206	0.53 GPH	2 LPH	87 PSI	6 BAR	120
0505	1.32 GPH	5 LPH	72 PSI	5 BAR	120
0507	1.32 GPH	5 LPH	101 PSI	7 BAR	120
0702	1.85 GPH	7 LPH	29 PSI	2 BAR	120
	2.64 GPH	10 LPH	14 PSI	1 BAR	120

### MA/A

Description	
	The MA/A is an analogic metering pump with a manual control from 0 to 100%. Level alarm is available upon request.
	230V and low voltage (12V and 24V) models are available upon request. 120V and 230V models are CSA certified.
	The PKX dosing pump is compact and can be wall-mounted or foot-mounted.

### FT/A

Description	
	The FT/A is an analog metering pump with manual flow control from 0 to 100%. It has two operating modes controlled by a reed switch water meter:
	• Volumetric proportional mode — 1:1 (1 injection per 1 signal) as indicated by F mode
	• Volumetric timer mode — 0 to 60 seconds of metering per signal
	Level alarm is available upon request.
The PKX dosing pump is compact and can be wall-mounted or foot-mounted.	

## DLX/DLXB Series

The DLXB, foot-mounted pump and the DLX, wall-mounted pump offer analogic or digital versions with 120 to 230 Volts. Low voltage models are available.

Operating features include:

- Manual pumps
- Proportional with water meter or flow meter
- 4-20 mA
- Directly to pH/ORP/Cl probes
- Level control
- Relay or MA outputs available

DLX/DLXB Wetted Parts	
Pump Head	PP (Polypropylene)
Diaphragm	PTFE (Teflon®)
Seals	FPM (Viton®) or EPDM (Dutral®)
Valves	Duck Bill FPM (Viton®) or EPDM (Dutral®)
Discharge Tubing	PE (Polyethylene)
Suction Tubing	PVC

DLX Wall-Mounted

DLXB Foot-Mounted

Version	Flow Rate		Pressure		Strokes Per Minute
0115	0.26 GPH	1 LPH	217 PSI	15 BAR	120
	0.53 GPH	2 LPH	145 PSI	10 BAR	120
	0.78 GPH	3 LPH	72 PSI	5 BAR	120
0220	0.53 GPH	2 LPH	290 PSI	20 BAR	120

0810	2.11 GPH	8 LPH	145 PSI	10 BAR	120
	2.64 GPH	10 LPH	101 PSI	7 BAR	120
	3.17 GPH	12 LPH	43 PSI	3 BAR	120
1504	3.96 GPH	15 LPH	58 PSI	4 BAR	120
2003	5.28 GPH	20 LPH	43 PSI	3 BAR	120

## MA/AD

	<b>Description</b>  The MA/AD is an analog metering pump. It has manual flow control with dual-scale adjustment from 0 - 20% to 0 - 100%. Level alarm is available upon request. 230V and low voltage (12V and 24V) models are available upon request. 120V and 230V models are CSA certified. DLXB with stroke length adjustment is available upon request.
---	--

## MA/MB

	<b>Description</b>  The MA/MB is a microprocessor controlled, digital metering pump. It has manual flow control from 0 to 100% with a 3-digit display, relay output, and level alarm. 230V models are available upon request. 120V and 230V models are CSA certified. DLXB with stroke length adjustment are available upon request.
---	--

## VFT/MBB

	<b>Description</b>  The VFT/MBB is a microprocessor controlled metering pump with four operating modes: a digital manual mode and three proportional modes, signaled by a reed switch water meter. 230V models are available upon request. Other features include a level alarm and a relay output. DLXB with stroke length adjustment are available upon request.
---	--

## MF/M

	<b>Description</b>  The MF/M is a microprocessor controlled, multifunction metering pump. Operating modes include digital manual mode, four proportional modes, signaled by a reed switch water meter and a 4-20 mA input. 230V and low voltage (12V and 24V) models are available upon request. 120V and 230V models are CSA certified. Other features are: backlit LCD display, level alarm, relay output, flow alarm, buzzer, clock, remote control and timer. DLXB with stroke length adjustment are available upon request.
--	--

## pH-Rx-CI/M

	<b>Description</b>  The pH-Rx-CI/M is a microprocessor controlled metering pump with pH, redox and chlorine regulating capabilities. pH measuring range is 0 to 14 pH; redox measuring range is -1000 to +1400 mV; and chlorine measuring range is 0 to 2, 0 to 20, and 0 to 200 ppm. 230V and low voltage (12V and 24V) models are available upon request. 120V and 230V models are CSA certified. Other features are: backlit LCD display, digital manual mode, on/off proportional mode, level alarm, 4-20 mA output, relay output, proximity switch, PT100 input, and manual/automatic temperature compensation - 32°F to 212°F (0°C to 100°C). DLXB with stroke length adjustment are available upon request.
---	--

## pH-Rx/MBB

	<b>Description</b>  The pH-Rx/MBB is a microprocessor controlled metering pump with pH and redox control. pH measuring range is 0 to 14 pH; redox measuring range is -1000 to +1400 mV. 230V and low voltage (12V and 24V) models are available upon request. 120V and 230V models are CSA certified. Other features include a backlit LCD display, digital manual mode, on/off proportional mode, level alarm, and manual/automatic temperature compensation - 32°F to 212°F (0°C to 100°C). DLXB with stroke length adjustment are available upon request.

# Motor Pump Series

## Diaphragm Motor Pumps

The ST-D & D Series are spring return, motor-driven mechanical diaphragm pumps. Mechanical diaphragm motor pumps are suitable when pumped liquid is abrasive or contains suspended solid particles. The Diaphragm Motor Pumps have flow capacities of 2.64 to 141.40 GPH at 50 Hz, 3.17 to 151.60 GPH at 60 Hz, with pressures up to 203 psi. The standard power supply is 230 – 400V, 3 phase, at 50 Hz and 275 – 480V, 3 phase at 60 Hz. Standard pump head materials are Stainless Steel, PVC, and Polypropylene.

## Piston Motor Pumps

The ST-P & P Series are spring return motor-driven mechanical piston pumps. Piston type pumps are suitable when pumped liquid is not abrasive and does not contain suspended solid particles. The Piston Motor Pumps have flow capacities of 1.59 to 221.38 GPH at 50 Hz, 1.85 to 265.20 GPH at 60 Hz, with pressure up to 360 psi. The standard power supply is 230 – 400V, 3 phase at 50 Hz and 275 – 480V, 3 phase at 60 Hz. Standard pump head materials Stainless Steel and PVC.

## ePool Series

The ePool series is designed for home swimming pools and wellness centers. The ePool uses micro-electronic technology which monitors in real-time and activates the peristaltic pump for the correct liquid dosage.

ePool Wall-Mounted

0301	0.79 GPH	3 LPH	21 PSI	1 BAR
0202	0.53 GPH	2 LPH	29 PSI	2 BAR
0303	0.79 GPH	3 LPH	43 PSI	3 BAR

### ePool

#### Description

The functions performed by the ePool are:

- Power supply – 110, 230VAC 50/60 Hz
- Maximum power supply – 15 W
- It has the possibility to measure two different types of electrochemical variables: pH or Rx in the ranges 5 to 9 "pH", +300 to +900mV "Rx"
- Set Point Selection
- Type of intervention (direct or inverse)
- Hysteresis
- ON/OFF or proportional activation mode respect to the measure value
- Delay time of the pump activation
- Over alarm, indicates an overdose situation. This is activated when the defined set point value is not reached in a predetermined time
- Relay output for signaled alarm status
- Level switch input

**Monitors in real-time and activates the pump for the correct liquid dosage.**

## F and B Peristaltic Pump Series

### F Series Peristaltic Pump

The F Series is a fixed peristaltic pump that is small in size and quiet. It's easy to maintain and safe to use.

F Series Wall-Mounted

Version	Flow Rate		Pressure	
0001	0.13 GPH	0.5 LPH	14 PSI	1 BAR
0101	0.29 GPH	1.1 LPH	14 PSI	1 BAR
0201	0.58 GPH	2.2 LPH	14 PSI	1 BAR
0301	0.87 GPH	3.3 LPH	14 PSI	1 BAR
0601	1.59 GPH	6.0 LPH	14 PSI	1 BAR

#### F

Description	
	Peristaltic pump F series features: <ul style="list-style-type: none"> <li>• A constant flow rate</li> <li>• Available 0.5 to 1, 1 to 2, 2 to 3, 3 l/h at 120 - 230V with Santoprene® or silicone tubing</li> <li>• Model 6.0 l/h only 24VDC</li> <li>• Tube is coupled to the external fitting with stainless steel clamps</li> <li>• Cover is anchored on the casing with 3 screws, there's a groove for an additional shaft support</li> <li>• The hydraulic head is independent of the motor type and can be supplied separately</li> <li>• Inter-axis holes: 42 mm - 1.65"</li> <li>• Anchoring panel thickness measure from 1 to 4mm – 0.04 to 0.16"</li> <li>• Available NSF certified version</li> </ul>

#### F-T

Description	
	Peristaltic pump F-T series features: <ul style="list-style-type: none"> <li>• A constant flow rate</li> <li>• Available 0.5 to 1, 1 to 2, 2 to 3, 3 l/h at 120 to 230V with Santoprene® or silicone tubing</li> <li>• Model 6.0 l/h only 24VDC</li> <li>• Tube is coupled to the external fitting with stainless steel clamps</li> <li>• Cover is anchored on the casing with 3 screws, there's a groove for an additional shaft support</li> <li>• The hydraulic head is independent of the motor type and can be supplied separately</li> <li>• Inter-axis holes: 42 mm - 1.65"</li> <li>• Anchoring panel thickness measure from 1 to 4mm – 0.04 to 0.16"</li> <li>• Available NSF certified version</li> <li>• Power supply with temporized flow control through potentiometer timer setting between 0 to 7 seconds</li> </ul>

## B Series Peristaltic Pump

The B Series is a peristaltic pump that is small in size and quiet. It's easy to maintain and safe to use.

**B Series Wall-Mounted**

Version	Flow Rate		Pressure	
0103	0.26 GPH	1 LPH	43 PSI	3 BAR
0101	0.39 GPH	1.5 LPH	21 PSI	1 BAR
0303	0.79 GPH	3 LPH	43 PSI	3 BAR
0301	0.79 GPH	3 LPH	21 PSI	1 BAR
0403	1.06 GPH	4 LPH	43 PSI	3 BAR
0601	1.59 GPH	6 LPH	14 PSI	1 BAR
1001	2.60 GPH	10 LPH	14 PSI	1 BAR
1201	3.17 GPH	12 LPH	14 PSI	1 BAR

### B3-V

	Description
	Peristaltic pump with flow adjustment from 0 to 100%. The flow is controlled adjusting the motor speed 90 to 260V by means of a potentiometer placed on the frontal part of the pump. Available with removable power cord.

### B-F

	Description
	Peristaltic pump with flow fixed. Power supply 230V. Available with removable power cord.

### B-FCD

	Description
	<p>Peristaltic pump with integral CD meter to monitor detergent concentration in washing systems. The pump automatically maintains the desired detergent concentration in accordance with a set point selected by the user. Direct function and upon request, reverse function.</p> <ul style="list-style-type: none"> <li>• Operating range 400 to 20,000 <math>\mu</math>S</li> <li>• LED pump ON indicator</li> <li>• Max flow: 6 l/h</li> <li>• Supplied with detergent accessories kit and conductivity probe</li> <li>• Available with removable power cord</li> </ul>

## BH Series Peristaltic Pump

The BH is a peristaltic pump that is small in size and quiet. It's easy to maintain and safe to use.

**BH Series Wall-Mounted**

Version	Flow Rate		Pressure		Hose
1001	26.41 GPH	10/100 LPH	21.7 PSI	1.	Norprene®
1001	26.41 GPH	10/100 LPH	21.7 PSI	1.	Santoprene®
1001	26.41 GPH	10/100 LPH	21.7 PSI	1.	Silicone
1001	26.41 GPH	10/100 LPH	21.7 PSI	1.	Tygon

### BH3-V

#### Description

"ADJUSTABLE" flow rate peristaltic pump, discontinuous duty. Tubes available in Norprene®, Santoprene®, Silicone, and Tygon LFL. Pump supplied with 4 mt suction and delivery pipe, foot filter and injection valve not included. Universal multi-tension power supply 90 to 260VAC.

## Bioclean Series Peristaltic Pump

The Bioclean is a peristaltic pump with timer.

**Bioclean Series Wall-Mounted**

Version	Flow Rate		Pressure	
0101	29 GPH	1.1 LPH	14 PSI	1 BAR
0201	57 GPH	2.2 LPH	14 PSI	1 BAR
0103	26 GPH	1 LPH	43 PSI	3 BAR
0202	53 GPH	2 LPH	29 PSI	2 BAR
0303	79 GPM	3 LPH	43 PSI	3 BAR

### Bioclean Control

#### Description

Peristaltic pump and electronic timer with day or week programs, 8 cycles with 1 minute minimum activation time. Santoprene® hose. Supplied with water treatment peristaltic pump accessories. Also available with electromechanical timer, activation time 15 minutes minimum.

### Bioclean Control/B

#### Description

Peristaltic pump and electronic timer with day or week programs, 8 cycles with 1 minute minimum activation time. Santoprene® hose. Supplied with water treatment peristaltic pump accessories. Also available with electromechanical timer, activation time 15 minutes minimum.

## Accessories

### eControl Series

The eControl series of controllers have been designed and developed to be used in wellness centers, home and public swimming pools. The controllers use galvanic isolated micro-processors protecting the measured readings from the application environment. Optional is an eControl with double measurement ranges that are independently configurable.

eControl Series Wall-Mounted

#### eControl

	Description	Part #
	<p>The Etatron eControl signal splitter receives a reed input signal from a water meter counter and divides it into four equal and synchronous reed output signals. It features:</p> <ul style="list-style-type: none"> <li>• Signals multiple devices, independently, from a 1PPG or 1PP10G water meter</li> <li>• LED indicator lights up for each pulse</li> <li>• Prewired for up to four devices</li> <li>• 120V, 60 Hz</li> <li>• IP65 water resistant</li> <li>• Just plug into your power supply and connect communication wires</li> </ul>	<p>EPC-Pulse Control</p>

#### ePC (ePulse Control)

	Description	Part #
	<p>The Etatron ePulse Control receives a reed input signal from a water meter and divides it into four equal and synchronous reed output signals. Use with a 1 pulse per gallon (1PPG) or 1 pulse per 10 gallons (1PP10G) water meter to eliminate any possibility of communication problems between devices. The ePulse Control features:</p> <ul style="list-style-type: none"> <li>• Signals multiple devices, independently, from a 1PPG to 1PP10G water meter</li> <li>• LED indicator lights up for each pulse</li> <li>• Prewired for up-to-four devices</li> <li>• Just plug into power supply and connect communication wires</li> </ul>	
	1 measure - 100/250V	CXB 70001 01
	2 measures - 100/250V	CXB 70002 01

## eSelect Series

The eSelect controllers are high-tech microprocessor based devices to measure and control one electrochemical parameter among pH value, Rx (Redox potential), Chlorine concentration and other electrochemical parameter. These controllers are highly flexible and can be configured to measure any of the above mentioned parameters, using a sensor. There is no need to worry about power supply settings, since they are automatically detected by controller at power-up.

### eSelect B2

	Description	Part #
	<b>Features:</b> <ul style="list-style-type: none"> <li>• Color backlit 4" display</li> <li>• Galvanic Isolated Electronics</li> <li>• 4 - 20 mA output (dynamic 0..500Ω) No. 2 current output for each measurements</li> <li>• TTL 0 – 999 imp/min output. No. 2 TTL output for each measurements</li> <li>• Measure pH 0 ... 14 0,01</li> <li>• Measure Rx (mV) - 1000 to +1400 ± 1mV</li> <li>• Chlorine measure 0 to 2, 0 to 20, 0 to 200, 0 to 2000 ppm</li> <li>• Temperature measure 32 to 212°F (0 to 100°C)</li> <li>• Weekly, Daily Timer for programmed dosing: flocculant cycle or probe cleaning</li> <li>• Internal memory data storage and USB output for downloading</li> <li>• Minimum and maximum measurement alarm function</li> <li>• Overdosing alarm function</li> <li>• Serial output for connecting to computer/network</li> </ul>	
	90 - 260VAC	CXB 50051 01
	12VDC - 24VAC/VDC	CXB 50051 11

### eSelect B3

	Description	Part #
	<b>Features:</b> <ul style="list-style-type: none"> <li>• Color backlit 4" display</li> <li>• Galvanic Isolated Electronics</li> <li>• 4 - 20 mA output (dynamic 0 to 500 Ω) No. 2 current output for each measurements</li> <li>• TTL 0 to 999 impulses/minute output. No. 2 TTL output for each measurements</li> <li>• Measure pH 0 to 14 0.01</li> <li>• Measure Rx (mV) - 1000 to +1400 ± 1 mV</li> <li>• Chlorine measure 0 to 2, 0 to 20, 0 to 200, 0 to 2000 ppm</li> <li>• Temperature measure 32 to 212°F (0 to 100°C)</li> <li>• Weekly, Daily Timer for programmed dosing : flocculant cycle or probe cleaning</li> <li>• Internal memory data storage and USB output for downloading</li> <li>• Minimum and maximum measurement alarm function</li> <li>• Overdosing alarm function</li> <li>• Serial output for connecting to computer/network.</li> </ul>	
	90 - 260VAC	CXB 50101 01
	12VDC - 24VAC/VDC	CXB 50101 11

### eSelect B4

	Description	Part #
	<p>The eSelect B4 controller measures the main parameters in water treatment applications. It is possible to connect the new controller to an Ethernet LAN to control all parameters and storage all data. We have used a 7" colored display touch screen to improve the view, with user-friendly settings and displays. The main technical characteristic of the B4 are the following:</p> <ul style="list-style-type: none"> <li>• 3 measure channels (4 on request), settable separately by the user: pH, RX, Cl<sub>2</sub>, Cl tot</li> <li>• Temperature measure</li> <li>• Automatic filter washing output</li> <li>• No. 2 auxiliary outputs activating by a weekly/daily timer</li> <li>• No.1 input water meter</li> <li>• No.1 Ethernet RJ45 (LAN) connection</li> <li>• No.1 USB to update firmware or to download data</li> <li>• Power supply 100-250VAC or 12-30VDC</li> </ul>	
	3 measures and temps	CXB 60001 01
	4 measures and temps	CXB 60001 02

## Complete line of replacement pump heads

eOne Series - standard pump head, PVDF, and manual air bleed.

	Description	Part #
	0.26 to 3.96 GPH (1 to 15 LPH), TFE/P (Aflas®) with ceramic ball valves, 4 x 6 and 6 x 8 mm tubing connections. For eMP, eOne Basic, eOnes excluding the 2007 and 3005 versions.	SCP8105471
	5.26 to 7.92 GPH (20 to 30 LPH), TFE/P (Aflas®) with ceramic ball valves, 4 x 6 and 6 x 8 mm tubing connections. For e128, eOne 2007 and 3005 versions.	SCP8006871

eOne Series - automatic air bleed pump head, PVDF.

	Description	Part #
	0.26 to 3.96 GPH (1 to 15 LPH) TFE/P (Aflas®) with ceramic ball valves, 4 x 6 and 6 x 8 mm tubing connections. This pump head enables the automatic bleed-off of gas generated by gaseous liquids. For eMP, eOne Basic, eOnes excluding the 2007 and 3005 versions.	SCP8015471

PKX and DLX/DLXB Series - standard pump head, polypropylene, manual air bleed. 0.26 to 3.96 GPH (1 to 15 LPH), 4 x 6 mm tubing connections.

	Description	Part #
	FPM (Viton®) with lip valves. Excludes DLX/DLXB 0220 and 2003 versions.	SCP0003002
	EPDM (Dutral®) with lip valves. Excludes DLX/DLXB 0220 and 2003 versions.	SCP0003006
	FPM (Viton®) with ceramic ball valves. Excludes DLX/DLXB 0220 and 2003 versions.	SCP0003082
	EPDM (Dutral®) with ceramic ball valves. Excludes DLX/DLXB 0220 and 2003 versions.	SCP0003084

PKX and DLX/DLXB Series - automatic air bleed pump head, PVDF, 4 x 6 and 6 x 8 mm tube connections.

	Description	Part #
	0.26 to 7.93 GPH (1 to 30 LPH) TFE/P (Aflas®) with ceramic ball valves. TFE/P (Aflas®) seals/o-rings. Includes eOne 2007 and 3005 versions.	SCP8016871
	0.26 to 7.93 GPH (1 to 30 LPH) TFE/P with ceramic ball valves. FPM (Viton®) seals/o-rings. Includes eOne 2007 and 3005 versions.	SCP8016851

Standard pump head (PP), 20 liters for DLX(B) 2003 versions - BT 20 l/h - 43.5 psi (3 bar) and 72 psi (5) with connection for 4 x 6 tube.

	Description	Part #
	FPM (Viton®) lip valve (without manual air bleed)	2083148
	EPDM (Dutral®) lip valve (without manual air bleed)	2083150
	FPM (Viton®) ceramic ball valve	2083160
	EPDM (Dutral®) ceramic ball valve	2083262

Standard pump head (PVC), 290 psi (20 bar) for DLX(B) 0220 versions - BT 2 + 5 l/h with connections for 4 x 6 tube.

	Description	Part #
	FPM (Viton®) lip valve	2083079
	EPDM (Dutral®) lip valve	2083085

## Injection Valve Kit

eOne, eMP, and e128

	Description	Part #
	Injection valve kit, PVDF with TFE/P (Aflas®), 4 x 6, 6 x 8 and 10 x 14 mm. M10 tubing	SVA0030021

e128

	Description	Part #
	Injection valve kit, PVDF with TFE/P (Aflas®), Pre-cut 1/2" for 6 x 8 mm tubes	SVA0833021

## Injection Valves

PKX and DLX/DLXB Series

	Description	Part #
	Injection valve, polypropylene with FPM (Viton®), 4 x 6 mm tubing	2144009
	Injection valve, polypropylene with EPDM (Dutral®), 4 x 6 mm tubing	2144015

## Tubing Kits

### eOne kits

	Description	Part #
	Injection valve and foot filter, PVDF with TFE/P (Aflas®) and 4 x 6 mm PVC and polyethylene tubing, 0.26 to 3.96 GPH (1 to 15 LPH). Excluding 2007 and 3005 versions.	SCO0030022
	Injection valve and foot filter, PVDF with TFE/P (Aflas®) and 6 x 8 mm PVC and polyethylene tubing, 5.26 to 7.92 GPH (20 to 30 LPH). For One eOne 2007 and 3005 versions.	SCO0031021

### e128 kits

	Description	Part #
	e128 tubing kit includes injection valve and foot filter, PVDF with TFE/P (Aflas®), 6 x 8 mm polyethylene (PE) and PFC tubing, 4 x 6 mm PVC tubing for e128 Medicator.	SCO0131021

### PKX and DLX/DLXB kits

	Description	Part #
	Injection valve and foot filter, polypropylene with FPM (Viton®) and 4 x 6 mm PVC and polyethylene tubing, 0.26 to 5.26 GPH (1 to 20 LPH) - standard (FPM).	2061002
	Injection valve and foot filter, polypropylene with EPDM (Dutral®) and 4 x 6 mm PVC and polyethylene tubing, 0.26 to 5.26 GPH (1 to 20 LPH) - standard (EPDM).	2061005

### PKX and DLX/DLXB kits

	Description	Part #
	Injection valve and foot filter, polypropylene with FPM (Viton®) and 4 x 6 mm PVC and polyethylene tubing.	SCO0030002
	Injection valve and foot filter, polypropylene with EPDM (Dutral®) and 4 x 6 mm PVC and polyethylene tubing.	SCO0030012

## Tubing

Delivery and suction tubes. For DLX, DLXB, PKX, and eOne up to and including the 15 LPH versions

	Description	Part #
	4 x 6 PE delivery tube - Sold by foot.	2003021
	4 x 6 PVC suction tube - Sold by foot.	DUT0000006
	4 x 6 Kynar® flex 2800 suction tube - Sold by foot.	DTU0010302
	6 x 8 PE delivery tube - Sold by foot.	ATU000603
	6 x 8 PVC suction tube - Sold by foot.	ATU0004202
	6 x 8 Kynar® flex 2800 suction tube - Sold by foot.	DTU0000901

## Foot Filters

### eOne series

	Description	Part #
	Foot filter with ceramic ball valve, PVDF with TFE/P (Aflas®). eOne and eMP versions.	SFT0030021

### e128

	Description	Part #
	Foot filter with ceramic ball valve, PVDF with TFE/P (Aflas®) and connections for 6 x 8 mm tube. For e128 and eOne series, versions 2007 and 3005	SFT0832021

### PKX and DLX/DLXB series

	Description	Part #
	Foot filter, polypropylene with FPM (Viton®), 4 x 6 mm tubing	2142001
	Foot filter, polypropylene with EPDM (Dutral®), 4 x 6 mm tubing	2142004

## Pressure Relief Valves

	Description	Part #
	Relief valve, PVC with PTFE diaphragm, manual counter pressure adjustment, 3/8" threaded connections. All Etatron pumps.	AVA0010101
	Hose nipples kit, 4 x 6 mm, PVDF. All Etatron pumps except eOne 2007 and 3005 versions and the e128.	KRA0005311
	Hose nipples kit, 6 x 8 mm, PVDF. For e128, eOne versions 2007 and 3005.	KRA0006213

## ePool Kits

	Description	Part #
	pH ePool pumps accessories includes pH plastic body electrode with 5 m cable, pH7 and pH9 buffer solutions in 55 mL containers, floating level switch complete with plastic support, 1/2" inline PP electrode holder, clamp 1/2" GF-DN50 saddle for electrode holder (2 pcs), PVC M/F 1/2" - 3/8" reduction nipple, PP tube nut (2 pieces).	SCO0003001
	Rx ePool pumps accessories include Rx plastic body electrode with 5 m cable, Rx 650 mV buffer solution in 55 mL container, floating level switch complete with plastic support, 1/2" inline PP electrode holder, clamp 1/2" GF-DN50 saddle for electrode holder (2 pieces), PVD M/F 1/2" - 3/8" reduction nipple, PP tube nut (2 pieces).	SCO0003002

## Water Meters

Totalizer water meter. Lightweight, analog that reads in gallons. Made of polypropylene. For PKX FT-A, eOne, e128, eMP, DLX MF/M, and DLXB VFT/MBB.

	Description	Part #
	3/4" - 1 pulse per gallon	WM34-1PPG
	3/4" - 1 pulse per 10 gallons	WM34-1PP10G
	1" - 1 pulse per gallon	WM100-1PPG
	1" - 1 pulse per 10 gallons	WM100-1PP10G
	1 1/2" - 1 pulse per gallon	WM150-1PPG
	1 1/2" - 1 pulse per 10 gallons	WM150-1PP10G

## Tanks

The vertical tanks are made of Polyethylene. They provide containment of toxic liquids and are suitable for prolonged exposure to UV, are weather resistant, and insensitive to aging. Compatible with all pumps.

	Description	Part #
	60 l tank	1SRB045
	108 l tank	1SRB002
	230 l tank	1SRB003
	315 l tank	1SRB004
	530 l tank	1SRB005
	1040 l tank	1SRB006

## Syringe Kit

The Syringe Kit s a prime pump kit with 4 mm and 6 mm adapters.

	Description	Part #
	4 mm and 6 mm adapters	07944-KIT

## Paddlewheel Flowmeter

The programmable Paddlewheel Flowmeter is made out of polypropylene and is pre-wired for dry contact signal. Features: 120 Volt, fits into pipe sizes 1/2" - 8", low flow capabilities down to 0.1 m/s (.3 ft/s), low power, high resolution. NOTE: Flowmeter must be used with flowmeter saddles. For PKX FT-A, eOne, eMF, eOne Plus, DLX MF/M, DLXB MF/M, DLX VFT, and DLXB VFT.

	Description	Part #
	Programmable Flow Sensor Paddlewheel, fits 1/2" to 4" pipe	PW-FLOW1/2-4
	Programmable Flow Sensor Paddlewheel, fits 5" to 8" pipe	PW-FLOW5-8

## Flowmeter Fitting Saddles

Fitting Saddle for the Paddlewheel Flowmeter. For PKX FT-A, eOne, eMF, eOne Plus, DLX MF/M, DLXB MF/M, DLX VFT, and DLXB VFT.

	Description	Part #
	2 1/2" PVC clamp on EPDM o-ring for PW-FLOW	SAD2.5INPVC
	2" PVC clamp on EPDM o-ring for PW-FLOW	SAD2INPVC
	3" PVC clamp on EPDM o-ring for PW-FLOW	SAD3INPVC
	4" PVC clamp on EPDM o-ring for PW-FLOW	SAD4INPVC
	6" PVC clamp on EPDM o-ring for PW-FLOW	SAD6INPVC
	8" PVC clamp on EPDM o-ring for PW-FLOW	SAD8INPVC

## Injection Fitting Saddles

Fitting Saddle for the Injection Valve. For PKX FT-A, eOne, eMF, eOne Plus, DLX MF/M, DLXB MF/M, DLX VFT, and DLXB VFT.

	Description	Part #
	2 1/2" PVC clamp on FKM o-ring for 1/2" injection	SAD2.5INPVC-INJ
	2" PVC clamp on FKM o-ring for 1/2" injection	SAD2INPVC-INJ
	3" PVC clamp on FKM o-ring for 1/2" injection	SAD3INPVC-INJ
	4" PVC clamp on FKM o-ring for 1/2" injection	SAD4INPVC-INJ
	6" PVC clamp on FKM o-ring for 1/2" injection	SAD6INPVC-INJ
	8" PVC clamp on FKM o-ring for 1/2" injection	SAD8INPVC-INJ

## Electrode Accessories

	<b>Description</b> pH electrode, polycarbonate, 0 - 14 pH with 16.4' (5 m) cable. For eOne Plus and DLX/DLXB pH versions.	<b>Part #</b> AEL0004921
	<b>Description</b> Rx electrode, polycarbonate, 1.000 mV with 16.4' (5 m) cable. For eOne Plus and DLX/DLXB pH versions.	<b>Part #</b> AEL0005021
	<b>Description</b> Glass body pH or Rx electrodes. Measuring range: pH - 0 to 14 pH, Rx - ± 1,000 mV. <b>Glass body electrode with screw connector</b>	<b>Part #</b>
	87 psi (6 bar) - 140°F (60°C), pH	AEL0003511
	87 psi (6 bar) - 140°F (60°C), Rx	AEL0004111
	145 psi (10 bar) - 176°F (80°C), pH	AEL0003601
	145 psi (10 bar) - 176°F (80°C), Rx	AEL0004201
	145 psi (10 bar) - 266°F (130°C) / 232 psi (16 bar) - 77°F (25°C), pH	AEL0004501
	145 psi (10 bar) - 266°F (130°C) / 232 psi (16 bar) - 77°F (25°C), Rx	AEL0004601
	<b>Glass body electrode with cable</b>	
	102 psi (7 bar), 212°F (100°C), pH - 16.4' (5 m)	AEL0002211
	102 psi (7 bar), 212°F (100°C), Rx - 16.4' (5 m)	AEL0002311
	<b>Description</b> Inline electrode holder, PVC	<b>Part #</b> 2143001
	<b>Description</b> Inline PP electrode probe holder with o-ring. 1/2" conical fitting for pH and Rx electrodes. Maximum pressure - 73 psi ( )	<b>Part #</b> KPS0002301
		
	<b>Description</b> Submersible electrode holder, PVC, 1 meter	<b>Part #</b> 2143003

## Coaxial Cable For Electrode

	<b>Description</b> Coaxial cable for screw connector electrodes with BNC and connector. 16.4' (5 meters). Use on any electrode without a cable.	<b>Part #</b> 2105004
---	--	--------------------------

## Temperature Probe Connection

	<b>Description</b> PT100 temperature probe with 1/2" connection in PVC. Tap type, 5 mt cable, 16.4 feet. Tmax 113°F (45°C), Pmax 72 psi. For DLX/DLXB pH-Rx-CI/M and eOne Plus versions.	<b>Part #</b> ASO0000302
---	---	-----------------------------

## Temperature Probe

	Description	Part #
	Stainless steel, PT100 temperature probe measuring range 32 to 212°F (0 to 100°C), for electrode holder. For DLX/DLXB pH-Rx-CI/M and eOne Plus.	ASO0002601
	Glass, PT100 temperature probe measuring range 32 to 212°F (0 to 100°C), for electrode holder. For DLX/DLXB pH-Rx-CI/M and eOne Plus.	ASO0002501

## Probe Holders

	Description	Part #
	Double electrode probe holder for pH and Rx electrode (Plexiglas®/PP) with maximum pressure of 73 psi ( ) and maximum temperature of 113°F (45°C).  For eOne Plus, DLX/DLXB, both pH versions.	SPS0001001
	Double electrode holder with flow sensor for pH, Rx electrodes and temperature probe. Features Plexiglas®/PP, manual flow rate adjustment, 2 wires proximity switch, manual sampling, maximum pressure is 73 psi ( ) and maximum temperature is 113°F (45°C).  For eSelect, eControl, DLX(B) pH-Rx-CI/M, pH-Rx-CI/M, and eOne Plus.	SPS0001201
	Double electrode holder with flow sensor for pH, Rx electrodes and temperature probe. Features Plexiglas®/PP, manual flow rate adjustment, 2 wires proximity switch, manual sampling, maximum pressure is 73 psi ( ) and maximum temperature is 113°F (45°C).  For DLX(B) pH-Rx/MBB.	SPS0001204

## Buffer Solutions

Buffer solution in polyethylene container (55 mL) for calibration and control of pH meter, Rx (ORP) meter, and conductometer (500 mL).

	Description	Part #
	pH 4. For pH probes, eOne Plus, DLX/DLXB pH-Rx/MBB, pH-Rx-CI/M and any controller with pH compatibility.	ASZ0000101
	pH 7. For pH probes, eOne Plus, DLX/DLXB pH-Rx/MBB, pH-Rx-CI/M and any controller with pH compatibility.	ASZ0000201
	pH 9. For pH probes, eOne Plus, DLX/DLXB pH-Rx/MBB, pH-Rx-CI/M and any controller with pH compatibility.	ASZ0000301
	Rx 475 mV. For Rx probes, eOne Plus, DLX/DLXB pH-Rx/MBB, pH-RX-CI/M, and any controller with Rx capability.	ASZ0001101
	Rx 650 mV. For Rx probes, eOne Plus, DLX/DLXB pH-Rx/MBB, pH-RX-CI/M, and any controller with Rx capability.	ASZ0001501

## Amperometric Sensors

Low pH dependence, compatible with presence of isocyanate acid, surfactants/flocculants, automatic temperature compensation, and pH working range of 4 to 14. Required constant flow rate of 30 to 40 l/h with maximum working pressure of 14.5 psi (1 bar) and maximum working temperature of 113°F (45°C). Cable not supplied. For DLX/DLXB pH-Rx-CI/M and eOne Plus versions.

	Description	Part #
	0 - 20 ppm (inorganic free and organic chlorine)	RSO0001701
	0 - 2 ppm (inorganic free and organic chlorine)	RSO0001702
	0 - 20 ppm (total chlorine)	ASO0001603
	0 - 2 ppm (total chlorine)	ASO0001604

Not compatible with presence of isocyanate acid, surfactants/flocculants, automatic temperature compensation, and pH working range: 4 to 8. Operative pH level must remain constant with a required constant flow rate of 30 to 40 l/h. Maximum working pressure of 14.5 psi (1 bar) and maximum working temperature of 113°F (45°C). Cable not supplied.

	Description	Part #
	0 - 200 ppm (inorganic free chlorine)	ASO0001605
	0 - 20 ppm (inorganic free chlorine)	ASO0001601
	0 - 2 ppm (inorganic free chlorine)	ASO0001602

High pH dependence. Not compatible with presence of isocyanate acid, surfactants, flocculants, iron and manganese. Automatic temperature compensation, required constant flow rate: 30 to 40 l/h with a maximum working pressure of 72.5 psi ( ) and a maximum working temperature of 122°F (50°C). Requires dedicated probe holder on request. Cable not supplied.

	Description	Part #
	0 - 10 ppm (inorganic free chlorine for potable high pressure water)	ASO0002001

Compatible with presence of surfactants automatic temperature compensation pH working range of 2 to 11. Required constant flow rate of 30 to 40 l/h. Maximum working pressure of 72.5 psi ( ) (with snap ring) and a maximum working temperature of 113°F (45°C). Cable not supplied.

	Description	Part #
	0 - 200 ppm	ASO0003301

Tensides and conductivity acids are tolerated, compatible with presence of surfactants, automatic temperature compensation, and pH working range of 2 to 11. Required constant flow rate: 30 to 40 l/h with a maximum working pressure of 14.5 psi (1 bar) and a maximum working temperature of 113°F (45°C). Cable not supplied.

	Description	Part #
	0 - 200 ppm (peracetic acid)	ASO0003201

Not compatible with presence of surfactants, automatic temperature compensation, pH working range of 1 to 14. Required constant flow rate of 30 to 40 l/h with a maximum working pressure of 14.5 psi (1 bar) and a maximum working temperature of 113°F (45°C). Cable not supplied.

	Description	Part #
	0 - 20 ppm (chlorine dioxide)	ASO0003101
	0 - 2 ppm (chlorine dioxide)	ASO0003102

## Amperometric Sensors

Compatible with presence of surfactants, automatic temperature compensation, pH working range of 2 to 14. Required constant flow rate of 30 to 40 l/h with a maximum working pressure of 14.5 psi (1 bar) and a maximum working temperature of 113°F (45°C). Cable not supplied.

	Description	Part #
	0 - 20 ppm (chlorine dioxide with surfactants)	ASO0004301
	0 - 2 ppm (chlorine dioxide)	ASO0004302

Low pH dependence, automatic temperature compensation, pH working range of 2 to 11. Required constant flow rate of 30 to 40 l/h with a maximum working pressure of 14.5 psi (1 bar) and a maximum working temperature of 122°F (50°C). Analog output signal 0 - 2,000 mV. Cable not supplied.

	Description	Part #
	0.05 - 10.00 ppm (ozone)	ASO0005501
	0.05 - 5.00 ppm (ozone)	ASO0005502

## Cable For Amperometric Sensors

Cable for membrane covered amperometric sensor with BNC connector for signal. Hirshmann connector for power supply.

	Description	Part #
	0.7 m - for DLX/Controllers	SCV0001003
	0.7 m - for eOne/eControl	SCV0001301
	0.7 m - for DLXB	SCV0001004
	2 m - for DLX/Controllers	SCV0001005
	2 m - for eOne/eControl	SCV0001302
	5 m - for DLX/Controllers	SCV0001006
	5 m - for eOne/eControl	SCV0001303
	15 m - for DLX/Controllers	SCV0001002
	15 m - for eOne/eControl	SCV0001304

## Probe Holders For Amperometric Sensors

	<p>Double probe holder for amperometric ion-selective probes and either pH, Rx or temperature probes. Flow rate adjustment and 2 wires proximity switch with manual sampling, Plexiglas®/PP, maximum pressure of 72 psi ( ) and maximum temperature 113°F (45°C).</p> <p>For DLX/DLXB pH-Rx-CI/M and eOne Plus versions.</p>	SPS0002001
	<p>Triple probe holder for pH, Rx, amperometric ion-selective and temperature probes. Flow rate adjustment, 2 wires proximity switch, Plexiglas®/PP, maximum pressure is 72 psi ( ), and maximum temperature is 113°F (45°C).</p> <p>For DLX/DLXB pH-Rx-CI/M and eOne Plus versions.</p>	SPS0001801

## e128 Pre-Plumbed Accessories

	<table border="1"> <thead> <tr> <th>Description</th><th>Part #</th></tr> </thead> <tbody> <tr> <td> <b>e128 Mediator Panel with ePulse Control</b>  This simple to install, preassembled panel includes the Etatron e128 mediator and an ePulse Control. You can easily attach a 1 pulse per gallon (1PPG) or a 1 pulse per 10 gallons (1PP10G) water meter that is already hooked up to your existing house control.   Specifications:  <ul style="list-style-type: none"> <li>• Ships preassembled</li> <li>• Panel is 17" x 24"</li> <li>• Pre-plumbed, simply connect 3/4" FPT to your plumbing line or by garden hose connection</li> <li>• Includes ePulse Control</li> </ul> </td><td>PE128.75IN1GPC</td></tr> </tbody> </table>	Description	Part #	<b>e128 Mediator Panel with ePulse Control</b> This simple to install, preassembled panel includes the Etatron e128 mediator and an ePulse Control.
